

PHASE THREE

Pace | Place | Path | Data

Pace

The students in Phase Three of blended learning will be allowed to work at their pace through the learning objectives. What techniques can the teacher use to help monitor the pace of the students?

Place

Students have the choice to work online, offline, with the teacher, and with other students in the blended learning environment. How can the students sign up to work with other students?

Path

Students have the ability to pick and choose what standards or projects they would like to work on during the blended learning environment. Create a sample checklist that would allow for choice of objectives.

Data

Students and the teachers will be using data to determine if they mastered an objective.

Project Based

Creating a Sample Lesson

Blended Learning Phase 3 allows the students to work at their own pace, place, and path while being driven by the data. The lesson must include:

- A mini lessons provided by the teacher
- Technology tools that provide data to the teacher and student
- Checklist or playlist of actives to complete
- 4C's projects to show mastery
- Checklist for the students that provide directions, time limits, partner groups, and/or due dates

For this project, you will need to design a sample blended learning phase 3 lesson that you can showcase or co-teach with a classroom teacher. Make sure to include all of the main elements listed above.

Phase 3 Lesson Objectives:

•

•

•

•

•

Phase 3 Assessment:

•

•

•

•

•
